VOLUME CONTENTS

Number 1/2

R. E. Baddour and S. Song	1	On the Interaction Between Waves and Currents
Hang Tuah and J. W. Leonard	23	Dynamic Response of Viscoelastic Cable Elements
T. S. Huang and J. W. Leonard	35	Lateral Stability of a Submarine Flexible Hoseline
J. G. M. Alexander	53	The Weighted Mapping Concept for Producing Design Excitations
C. Swan and J. F. A. Sleath	65	A Second Approximation to the Time-mean Lagrangian Drift Beneath a Series of Progressive Gravity Waves
H. Miyata, N. Shikazono and M. Kanai	81	Forces on a Circular Cylinder Advancing Steadily Beneath the Free-surface
S. Gomathinayagam, M. V. Dharaneepathy and M. N. Keshava Rao	105	The Influence of Wave–Current Sea States on the Reliability Estimates of Offshore Towers
V. Sundar, S. Neelamani and C. P. Vendhan	125	Diffracted Wave Field and Dynamic Pressures Around a Vertical Cylinder
S. Schalck and J. Baatrup	155	Hydrostatic Stability Calculations by Pressure Integration
A. C. Caolo and S. Spotte	171	Design of a Rapid-flow Seawater Supply System for the University of Connecticut's Marine Laboratory at Noank

Number 3

M. E. McCormick and R. Bhattacharyya	179	Obituary
A. N. Williams and W. I. Moubayed	181	Earthquake-induced Hydrodynamic Pressures on Submerged Cylindrical Storage Tanks
P. R. Payne	201	Planing and Impacting Plate Forces at Large Trim Angles

B. M. Stone, M. A. Sullivan, V. M. Arunachalam and D. B. Muggeridge	235	Model Studies of the Motion Response of a Damaged Four Column Semisubmersible in Regular and Irregular Waves
A. Pui-Chun Lui and J. Y. K. Lou	263	Dynamic Coupling of a Liquid–Tank System Under Transient Excitations
H. Miyata and Young-Gill Lee	279	Vortex Motions About a Horizontal Cylinder in Waves
Chih Wu	307	Specific Power Optimization of Closed-cycle OTEC Plants
Technical Note *R. Latorre and S. Ryan*	315	Study of the Splash Angle from a Plate at Small Incidence Angle and Edge Emergence
Books Received	321	

Number 4

S. Kumaran and R. A. Skop	323	Implementation of an Expert System for the Design of Single-point, Subsurface Oceanographic Moorings
D. L. Kriebel	345	Nonlinear Wave Interaction with a Vertical Circular Cylinder. Part I: Diffraction Theory
M. S. Kirkgöz	379	An Experimental Investigation of a Vertical Wall Response to Breaking Wave Impact
A. R. Packwood	393	Performance of Segmented Swept and Unswept Cable Fairings at Low Reynolds Numbers
Technical Note *A. W. Lewis and R. N. Allos*	409	JONSWAP's Parameters: Sorting Out the Inconsistencies
Technical Note *T. Welo and K. J. Eidsvik*	417	Ocean Wave Spectrum Variations at Tromsøflaket. Objective Estimation
News and Notices	425	

Number 5

A. N. Williams, A. G. Abul-Azm and S. A. Ghalayini	427	A Comparison of Complete and Approximate Solutions for Second-order Diffraction Loads on Arrays of Vertical Circular Cylinders
K. Subbiah, Hin-Fatt Cheong and N. Jothi Shankar	447	Random Wave Forces on Horizontal Cylinders
C. B. Sajonia and J. M. Niedzwecki	463	Wave Force Prediction Using an Autoregressive Model
A. J. N. A. Sarmento, L. M. C. Gato and A. F. de O. Falcão	481	Turbine-controlled Wave Energy Absorption by Oscillating Water Column Devices
S. L. Lau, Z. Ji and C. O. Ng	499	Dynamics of an Elastically Moored Floating Body by the Three-dimensional Infinite Element Method
Technical Note		
Z. Demirbilek	517	Design Formulae for Offset, Set Down and Tether Loads of a Tension Leg Platform (TLP)

Number 6

M. R. Haddara and D. W. Bass	525	On the Form of Roll Damping Moment for Small Fishing Vessels
G. Castro and C. Villoria	541	Determination of Frequency Spectral Parameters for Shallow Water Waves
R. E. Baddour and S. W. Song	551	Interaction of Higher-order Water Waves with Uniform Currents
P.-L. Bourget and D. Marichal	569	Remarks About Variations in the Drag Coefficient of Circular Cylinders Moving Through Water
U. A. Korde	587	Study of a Wave Energy Device for Possible Application in Communication and Spacecraft Propulsion
Volume 17 Title Section, Contents and Author Index	i
